

SAFE VISIT

Scan. Tap. Checked-In™
A community driven contact tracing system

SafeVisit was born in necessity.

... and with the desire to help.

Underpinned and developed from within the Queensland Junior Chamber of Commerce, SafeVisit is a free, intuitive and simple contact tracing platform for all business & industry to utilise. This is our way to help support so many who have supported us for so long in the push to reclaim businesses, livelihoods, economies and 2020.

Strong adoption across not only hospitality & retail but professional services, sporting & recreation, construction & trades, government and education validated our suitability to all businesses & industries in providing a streamlined and integrated Contact Tracing platform for all.

Scan the code to the left or visit the URL to see our media coverage on how we have helped the community in improving their contact tracing procedure.

There are integral and very important differences that SafeVisit presents over all other Contact Tracing platforms:

- It is not an app to be downloaded. Time & again this is resisted to and has been proven to be a sizeable impediment to adoption
- Entirely developed and built-in Queensland. No data backdoors or ghosted data siphoned internationally
- All data only used for Contact Tracing and only kept onshore in Australia complying to all Federal Privacy & Cyber Security legislation
- Only Contact Tracing platform developed in consultation with Queensland Health provide assurity of data retained, security adhered to and best possible practices

From Innisfail to Coolangatta, from Stanthorpe to Gladstone and all over Queensland, SafeVisit is already serving to help in the fight against COVID19, so let's make it even better!

With support from
